

Job Opening ~ Field Technician

Renewable Design Associates, LLC (RDA) is seeking several qualified individuals to join our field team. We are a dedicated, capable group committed to quality and working on a variety of unique projects in NC and the Southeast.

This is a hands-on position primarily in the field, based out of our office in Asheville, NC. The Field Technician will support the following types of projects, both locally and regionally:

- Commercial & Industrial Solar installation (primarily 20kW to 2MW)
- Commercial & Industrial Solar Operations & Maintenance, repair and troubleshooting (primarily 20kW to 5MW)
- Installation of industrial electric vehicle infrastructure (60kW +)
- Installation and Operations & Maintenance of grid-level storage and microgrid systems

Candidate will participate in all phases of these projects, from preparation to installation and commissioning. We are looking for someone with an eye for detail and a strong work ethic.

An ideal candidate will have:

- At least 2 years of electrical construction experience including:
 - Experience with all types of conduit including IMC and RMC
 - Experience with three phase services
 - Experience troubleshooting both AC and DC electrical systems
- 1 year of **non-residential** solar installation, O&M, and/or QA/QC experience, including:
 - String and Central inverter diagnostics and troubleshooting
 - Rooftop and ground mounted racking systems (including tracking)
- Ability to think critically and solve problems in the field
- A background including general construction
- Experience working with and around heavy machinery
- Excellent written communication skills

Other preferred qualifications:

- OSHA 10
- NFPA 70e Arc Flash Training

Required qualifications:

- Ability and willingness to travel regionally as needed
- Ability to follow company safety procedures
- Clean driving record and ability to pass employment screening
- Ability to lift 75 pounds

Additional Responsibilities:

- Maintain neat and orderly job sites
- Keep work vehicles clean and organized
- Inventory and organize spare parts in the warehouse
- Interact and communicate clearly with customers and contractors

Job Details

We are searching for the best candidates and are open to a variety of experience levels. You can expect above-market pay depending on experience and qualifications.

- Full-time, hourly based in Asheville and working regionally
- 8-10 hour shifts
- Opportunity for growth

Please apply by sending a resume and cover letter in .PDF format to jobs@renewabledesignassociates.com.
